Inteliquent Unveils Omni Offering for Next-Gen Communications Providers

"One-Stop-Shop" Solution Simplifies Voice and Messaging Connections Using the Nation's Most Trusted Network

CHICAGO, April 11, 2016 (GLOBE NEWSWIRE) -- Inteliquent, Inc. (NASDAQ:IQNT), the nation's most trusted, voice, text and messaging network for communications service providers, announced today at the 2016 INCOMPAS Show in Washington, D.C., the launch of Omni, a comprehensive voice and messaging solution for the over-the-top (OTT) and Direct Inward Dialing (DID) market. For the first time, Omni will enable communication providers to easily and efficiently power their solutions using Inteliquent services.

"The world of telecommunications can be complex, so we developed Omni, a one-stop-shop, to make integrating voice and messaging functionality into any solution easy and accessible," said Brett Scorza, Inteliquent's CIO and EVP of product development. "Omni allows our customers to focus time and resources on growing their businesses and creating the best solutions for their customers."

Omni equips all service providers, whether they are more traditional telecommunications or next generation communications service providers, with all inbound and outbound voice call flows, message-enabled DIDs, inbound and outbound SMS and MMS messaging, and the market's most user-friendly Web portal and APIs for seamless integration and automation.

"As a wholesale solutions provider focused on delivering quality service, we needed to infuse our inbound DID service as cost effectively as possible," said Neil Rosenblit, CEO, Blitz Telecom. "We chose Omni because we wanted our communications routed through the most reliable network and because it provided us complete control over our communications functionality, while enabling us to easily automate and scale. The portal is also very intuitive, shortening our learning curve to help us save costs and expedite our solution's time to market."

Omni is delivered through Inteliquent's high quality network, which is used by virtually all of the top telecommunication companies in the United States. The network connects millions of voice calls every day.

The new platform also expands the company's offering to providers in the next generation market, a key component of Inteliquent's Growth Forward business strategy.

"Demand for communications that enables two-way connections is increasing rapidly. This is the new paradigm for communications and, through Omni, we've created the infrastructure to power it," said Alissa Clousing, Inteliquent's vice president of product. "Inteliquent is constantly innovating and moving beyond voice to better serve our customers and reach new entrants in the communications world to diversify our revenue stream, one of our primary focus areas of our Growth Forward plan. This truly signifies our evolution from a traditional voice-only telecommunications provider to the premier interconnection partner for communication providers of all types."

Representatives will be onsite at the INCOMPAS Show in Meeting Room 31 to discuss how Omni and Inteliquent are shaping the new communications ecosystem. For more information, please visit <http://www.inteliquent.com/industry-solutions/next-generation>

About Inteliquent

Inteliquent is a premiere interconnection partner for communication service providers of all types, including voice, text and messaging. As the nation's most trusted network, Inteliquent is used by nearly all national and regional wireless carriers, cable companies and CLECs in the markets it serves, and its network carries approximately 17 billion minutes of traffic per month. Please visit Inteliquent's website at www.inteliquent.com and follow us on Twitter @Inteliquent.

Cautionary Statement Regarding Forward-Looking Statements

This press release contains "forward-looking statements" that involve substantial risks and uncertainties. All statements, other than statements of historical fact, included in this press release are forward-looking statements. The words "anticipates," "believes," "efforts," "expects," "estimates," "projects," "proposed," "plans," "intends," "may," "will," "would," and

similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements we make. Factors that might cause such differences include, but are not limited to: our ability to market the Omni voice and messaging solution, including the risk that the service will not meet our targets for revenue or profitability, including EBITDA and Adjusted EBITDA; the risk that our costs to provide the Omni voice and messaging solution will be higher than we expect; the effects of competition and downward pricing pressure resulting from such competition; the impact of current and future regulation, including rules or regulations enacted by the Federal Communications Commission; the risks associated with our ability to successfully develop and market other new services, many of which are beyond our control; technological developments; the ability to obtain and protect intellectual property rights; and other important factors included in our reports filed with the Securities and Exchange Commission, particularly in the "Risk Factors" section of our Annual Report on Form 10-K for the period ended December 31, 2015, as such Risk Factors may be updated from time to time in subsequent reports. Furthermore, such forward-looking statements speak only as of the date of this press release. We undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.
