## **INTELIQUENT UNVEILS THE LATEST ADDITION TO ITS ROBUST SERVICE OFFERINGS, EMERGENCY SERVICES**

**Plymouth, MN – January 15, 2018** – Inteliquent, Inc., a premier network-based communications enabler focused on delivering high quality, reliable voice and messaging services, announced today the launch of its suite of Emergency Services solutions.

The suite of highly resilient services will modernize Emergency Communications between our service provider customers and the public safety infrastructure. Inteliquent is employing the breadth and depth of our intelligent network, our operational expertise, and our knowledge of next generation emergency services needs to bring these services to market.

Inteliquent's Emergency Services 9-1-1 Gateway offers service providers transport and delivery of 9-1-1 calls to PSAPs nationwide. Customers gain efficiencies by leveraging Inteliquent's national scale and expertise to manage the transition from legacy to modern networks and achieve synergies by removing under-utilized and expensive selective router connectivity expenses.

The 9-1-1 Gateway with Nomadic Location (VPC) service is a comprehensive 9-1-1 address management, call routing and delivery service building upon 9-1-1 Gateway. Paired with Inteliquent's Inbound voice services, providers can get their telephone numbers and 9-1-1 service from the same vendor, removing complexities and making it easy to do business.

NG 9-1-1 ESINet Gateway is Inteliquent's solution for government entities migrating to Next Generation 9-1-1, providing a simple and unified approach to aggregation of 9-1-1 calls and delivery to NG 9-1-1 systems. ESINet Gateway provides a NENA consistent, simplified interconnection for service providers, enabling a timely, cost-effective, and accelerated transition to NG 9-1-1.

Inteliquent's 9-1-1 COO & GM, Chandy Ghosh said, "We're excited to announce three of the most sought after and reliable emergency services that will support our customers and their end-users, with additional products on the horizon. Our solutions are deployed in a redundant, diverse, and resilient configuration to ensure a high level of availability."

Inteliquent will be presenting at NENA's NG9-1-1 Standards and Best Practices Conference being held in Orlando, FL. Jan 15-18, 2018.

### **About Inteliquent**

Inteliquent is a premier network-based communications enabler focused on delivering high quality, reliable and robust voice and messaging services. The foundation of our services is our network, which is trusted by the nation's largest wireline, wireless, cable, long distance and cloud communication service providers. Every month the Inteliquent network carries over 25 billion voice minutes and text messages, serving over 190 markets and reaching over 8,200 on-net rate centers across the U.S. We are committed to enabling customers with the capabilities they need to deliver

communications solutions across various applications in a continuously changing environment. For more information, please visit [www.inteliquent.com](http://www.inteliquent.com).
